

System Comparison

from Solar Heat Exchange Manufacturing

DARE TO COMPARE

The Simple Drainback System from Solar Heat Exchange Manufacturing has less components so it is easy to install. Easy installation means less time spent on training, installation and maintenance. Our system saves you time, and time equals money. See our comparison:

	STANDARD PRESSURIZED GLYCOL	STANDARD DRAINBACK	SIMPLE DRAINBACK
COMPONENTS	Storage Tank Expansion Tank Pressure Guage Pressure Relief Valve Fill Valves Flow Guage Controller Pump	Storage Tank Drainback Tank Sight Glass Drainback Tank Stand Controller Storage Pump Solar Pump	Simple Drainback Tank Flowmeter Controller Pump
INSTALLATION	Requires Specialized Training to Configure & Pressurize the System Requires Special Equipment for Charging the System Hauling Glycol	Advanced Training for Proper Configuration of Tanks & Pumps Hauling Distilled Water	Five Simple Connections
MAINTENANCE	Check Glycol for Acidity Levels Drain, Refill, & Pressurize the System When Acidity Level is High Pump Running?	Check & Refill the Drainback Tank Fluid Level Pumps Running?	Pump Running?
SOLAR FLUID	Propylene Glycol is Messy Becomes Corrosive Over Time Shipping Costs Expensive	Distilled Water	Tap Water
TIME = MONEY	Many Components Must be Hauled, Unpackaged & Assembled Expensive Training Seminars & Hands On Experience Charging the System	Many Components Must be Hauled, Unpackaged & Assembled Expensive Training Seminars & Hands on Experience	Pre-Assembled Free On-line Training
